

**Endomicroscopy Learning Centre with many interesting features:
Discover clinical case studies or even publish your own cases
online!**

Leading experts in the field of endomicroscopy have created a new online platform in cooperation with PENTAX. The website www.endomicroscopy.info is designed as an interactive learning centre and guarantees international exchange about endomicroscopic topics. Visitors will find detailed information about the technique, disease patterns and the specialities of endomicroscopy.

The core of the website is the interactive learning centre with many case studies from everyday clinical practice. In this section a short introduction to a specific case study is given. Afterwards endoscopic, confocal and histological pictures as well as short video sequences of different disease patterns from upper to lower GI are shown. Take the unique opportunity to firstly make your own diagnosis afterwards press the "show comments" button to display precisely placed arrows that include explanations and comments of leading experts in the field of endomicroscopy.

If you are already using endomicroscopy you may even publish your own cases on www.endomicroscopy.info. After registration and login to the user-friendly personal area you will be able to upload your own case study including comments on different examination pictures and videos. By publishing your own case studies you may show your scientific ambition and you will furthermore profit by the feedback of the visitors of the endomicroscopy learning centre.

The new website www.endomicroscopy.info can be seen as the most important website for physicians, who are interested in the technique of Endomicroscopy.

Just click on the Link below and experience the interactive elements of this website.
